ROEQ TB75 Top Belt

The TB75 is developed to support internal logistics in industry and healthcare facilities.

The basic functionality of TB75 is to perform automated load and unload operations and thereby making MiR100/MiR200 able to carry out scheduled pick-up and delivery tasks.

The height of the TB75 can be set manually from 650 mm to 850 mm.

Optionally the TB75 can be delivered with fully automated lifter, so goods can be collected and delivered in heights from 650mm to 850mm.

Belt measurements

Width 400 mm
Length 830 mm

Motorized Top Belt

The motorized TB75 can solve various logistics tasks.

Height adjustment

Fixed height or automated height adjustment from 650 mm to 850 mm.

Maximum payload

MiR100: 75 kg
MiR200: 75 kg

This is how the ROEQ TB75 works

The MiR100/MiR200 with TB75 carrying goods to be unloaded.

The ROEQ TB75 is optionally delivered with an automatic height adjustment solution, which gives the opportunity to collect and deliver in different heights.
