ROEQ TML150 Top Module Lifter

The TML150 is developed to support internal logistics in industry and health care facilities.

The basic functionality is to use MiR100/MiR200 with the TML150 to move goods between logistic points.

The TML150 can be customized to support a variety of pallets and fixtures that are already a part of an existing assembly flow.
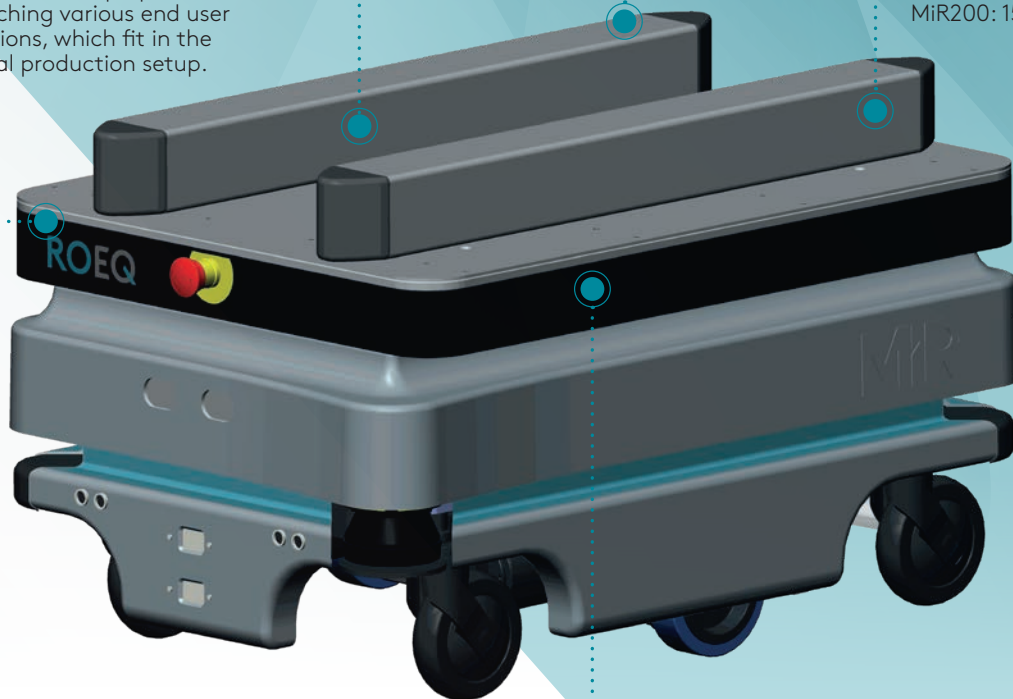

Application interface
The Top Module is prepared for attaching various end user applications, which fit in the individual production setup.

Lifter area
800 x 600 mm

Maximum payload
MiR100: 50 kg
MiR200: 150 kg

Docking
When MiR100/MiR200 arrives at the Docking Station, the lifting mechanism enables the loading and unloading of goods to e.g. an assembly line.

Top Module
The TML150 has a built-in lifting mechanism that enables easy pick up of packages, pallets, fixtures etc.

This is how the ROEQ TML150 works

MiR100/MiR200 with TML150 approaches the Docking Station.

MiR100/MiR200 unloads the goods on the Docking Station by lowering the Top Module.

MiR100/MiR200 with TML150 leaves the goods on the Docking Station and is off on a new mission.
